SUMMARY

AI & Data Science graduate (B.E., SPPU) with hands-on experience in Python, SQL/MySQL, Power BI, Git and GitHub across software development, data analysis and AI/LLM API integration internships. Built GramSathi, an e-governance platform on MySQL with AI-based complaint categorization, a Power BI sales dashboard and a Python Expense Tracker. Completed SQL and Power BI certifications and an AI tools workshop. Seeking entry-level Python, SQL, Data Analytics or AI/Data roles.

EDUCATION

B.E. Artificial Intelligence & Data Science | PVG College of Engineering, SPPU 2022 – 2026

EXPERIENCE

JioFiber Associate | Quess Corp Limited Aug 2026 – Oct 2026

- Resolved customer and service issues for JioFiber operations by following defined processes and escalation procedures, keeping service records accurate and coordinating with internal teams for timely resolution.

Python Programming Intern | Oasis Infobyte Jul 2026 – Aug 2026

- Built Python programs through hands-on tasks, applying core concepts, application logic and problem solving.

Software Engineer Intern | XMEGA Jan 2026 – Jun 2026

- Implemented features and tested and debugged code across the application.
- Investigated issues systematically and validated every change before completion.

Data Analysis Intern | Talent Battle Jun 2025 – Aug 2025

- Cleaned structured datasets and performed EDA in Python to prepare analysis outputs that supported business insights.

PROJECTS

GramSathi – E-Governance Platform | Python, MySQL, SQL, REST API, AI Integration

- Built an e-governance platform on MySQL to digitize rural governance services (users, services, applications, complaints, announcements), writing SQL queries for data retrieval.
- Integrated an AI service via REST API (JSON) to auto-categorize citizen complaints, adding error handling and a manual-categorization fallback so the system keeps working when the AI service is unavailable.

Motorola Sales Dashboard | Power BI, Data Visualization

- Designed an interactive dashboard with KPI cards (total sales, quantity, average, transactions) and visuals for city-wise transactions (map), units sold over time, sales by model, payment split and customer ratings.
- Added slicers for month, mobile model and payment method to enable instant filtering.

Expense Tracker | Python, Flask, SQLite, SQL, REST API, JavaScript, HTML/CSS, Docker, pytest

- Built a full-stack expense tracker with a Python OOP service layer, Flask REST API, web UI and CLI on a SQLite database (4 tables, constraints, indexes).
- Wrote SQL for summaries, month-over-month change (CTE + LAG) and budgets; added natural-language quick add, recurring-payment detection, pytest tests, Docker and GitHub Actions CI.

TECHNICAL SKILLS

- **Languages & Core:** Python, SQL, JavaScript, OOP, Problem Solving, Debugging, Testing, Backend Development
- **Databases:** MySQL, SQLite, DBMS, Joins, Aggregation, Database Integration
- **Data & BI:** Power BI, Excel, Data Cleaning, EDA, Data Visualization, Dashboard Design
- **APIs & AI:** REST API, Flask, JSON, API Integration, LLM API Integration, Prompt Engineering, ChatGPT & AI Tools
- **Tools:** Git, GitHub, Docker, pytest, GitHub Actions, Version Control, Branching, Commits, Repository Management

CERTIFICATIONS & ASSESSMENTS

- SQL Course (Self Learning) – Skill Course, Oct 2026 (ID: SC-C3C0FBBF48)
- Microsoft Power BI (Self Learning) – Skill Course, Oct 2026 (ID: SC-446DD41B7B)
- AI Tools & ChatGPT Workshop – be10X, Jul 2026
- Google Data Analytics Professional Certificate – Coursera
- Campus Recruitment Technical Training (126 Hours) – Ethnus, Jun – Jul 2025 (ID: R5PQ8TWJ)
- TCS iON NQT (IT), Jun 2026 – Cognitive 74.59% | Quant & Reasoning 64.84% | Python 65.91%

ACHIEVEMENTS & LANGUAGES

- Winner – Inter-College Cricket Tournament (Team Captain), 2026; represented Maharashtra in the All India National Cricket Championship, Goa
- Languages: English, Hindi, Marathi
